

DWA_03.5 Knowledge Check_DWA3.2

```
# Gherkin is a line-oriented language that uses indentation to define
structure. Either spaces or tabs may be used for indentation. One line
should be treated as one step and mostly it starts with a keyword . #

# a line that starts with a hash sign (#) is treated as comment
```

```
# Gherkin Syntax
## Feature:
### Scenario:
    Given:
    when:
    and:
    Then:
```

1. User story(ies) in Gherkin syntax for the "+" button.

```
## Feature: Tally count App - Increment Count with "+"
```

```
Scenario: User increments the tally count using the "+" button
    Given the user is on the main screen of the Tally App
    When the user selects a tally to update
    And the user taps the "+" button
    Then the tally count should increase by 1
```

```
## Feature: Tally count App - Customizable Increment Value with "+"
```

```
Scenario: User increments the tally count with a custom value using the
"+" button
    Given the user is on the main screen of the Tally App
    And the user has selected a tally with a custom increment value of 5
    When the user taps the "+" button
    Then the tally count should increase by 5
```

```
## Feature: Tally count App - Visual Feedback for "+"
```

```
Scenario: User receives visual feedback when using the "+" button
```

```
Given the user is on the main screen of the Tally App
When the user selects a tally to update
And the user taps the "+" button
Then a visual indicator, such as a brief animation or color change,
should appear to confirm the button press
```

2. User story(ies) in Gherkin syntax for the "-" button.

Feature: Tally App - Decrement Count with "-"

Scenario: User decrements the tally count using the "-" button

```
Given the user is on the main screen of the Tally App
When the user selects a tally to update
And the user taps the "-" button
Then the tally count should decrease by 1
```

Feature: Tally App - Customizable Decrement Value with "-"

Scenario: User decrements the tally count with a custom value using the "-" button

```
Given the user is on the main screen of the Tally App
And the user has selected a tally with a custom decrement value of 5
When the user taps the "-" button
Then the tally count should decrease by 5
```

Feature: Tally App - Visual Feedback for "-"

Scenario: User receives visual feedback when using the "-" button

```
Given the user is on the main screen of the Tally App
When the user selects a tally to update
And the user taps the "-" button
Then a visual indicator, such as a brief animation or color change,
should appear to confirm the button press
```
